PROFILE

Web development enthusiast with hands-on experience in building interactive, responsive web applications using **HTML, CSS, and JavaScript**. Skilled in implementing dynamic UIs and applying real-world concepts through projects and internships. Eager to contribute to team-driven environments and grow as a front-end developer.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science 2021 – 2025 | Mandya
Mysuru Royal Institute of Technology, (CGPA: 8.37)

SKILLS

Programming Languages — HTML | CSS | JavaScript | Java (Basic)

Frameworks & Libraries — React.js | Tailwind CSS

Database — SQL (Basic Queries, Joins)

Tools & Platforms — Git | GitHub | VS Code | SQL Server

PROFESSIONAL EXPERIENCE

Qspiders CampusConnect 11/2023 – 12/2023 | Mysuru, India
Intern

- Developed Java programs using OOP principles such as inheritance and encapsulation.
- Integrated Java applications with databases using JDBC for CRUD operations.
- Implemented exception handling to ensure stable program execution.
- Explored multithreading basics to understand asynchronous flow control.

ICT Academy 09/2024 – 10/2024
Trainee

- Completed foundational training in Microsoft Azure AI services via ICT Academy.
- Practiced building basic machine learning models and deploying them on Azure cloud.
- Explored tools like Azure ML Studio for data analysis and prediction tasks.

PROJECTS

Mehendi By Heba - A Responsive Mehendi Showcase Website [🔗](#)

Built a responsive website to showcase Mehendi designs with an interactive gallery and transitions using Reactjs. Integrated Web3Forms for backend-free contact form handling. Deployed on Vercel for fast performance.

Tech Used: React, Vite, CSS, Web3Forms, Vercel.

Houseify - A Modern Real Estate Landing Page Website [🔗](#)

A modern real estate landing page with animated UI and responsive design. Built to showcase projects, testimonials, and contact form functionality.

Tech Used: React.js, Tailwind CSS, Framer Motion, Web3Forms, Vite.

Password Generator & Color Changer (React.js, Tailwind CSS) [🔗](#)

Built a password generator and color switcher with React.js and Tailwind CSS. Deployed on Vercel.
